

Bench & Bloom

LABEL PRINTING INSTRUCTIONS · ULINE2026

The product

Bench & Bloom Lavender Simple Syrup — a small-batch culinary syrup, grown and made on the Naramata Bench in British Columbia. Four ingredients: estate-grown **Grosso lavender** (steeped as whole buds, never an extract), **butterfly pea flower**, cane sugar and water. The butterfly pea gives it a natural deep blue that **blooms to pink** when citrus is added — no dyes, no essential oils, no synthetic flavour. Built for gin, vodka and sparkling cocktails, and equally good as a mocktail or in coffee. Net 250 mL. Premium, clean-label positioning.

The bottle

Bottle	Uline S-23397 — 8 oz Clear Boston Round glass (Type III soda-lime)
Dimensions	Height 5.437" · body diameter 2.375" · circumference 7.46"
Neck finish	28-400 · fills ~8.5 oz to brim (250 mL leaves headspace)
Label panel	3.125" tall straight wall
Tamper band	Uline S-17668 black shrink band, 55 × 28 mm, over cap/neck (above label)

Labels — two per bottle (front + back)

Trim (cut size)	2.5" W × 2.75" H each
Bleed	0.125" all sides → artwork 2.75" × 3.0"
Safe margin	0.125" inside trim (keep all text/logo inside)
Guides	Magenta dashed = trim, cyan dashed = safe. Delete the #guides layer (non-printing).
Layout	Front + back on opposite faces, ~1.2" glass windows each side so the blue syrup shows.

Print specifications

Colour mode	CMYK
Lavender / Dark Denim	■ #5A4A78 · C25 M38 Y0 K53
Chalk White ground	□ #F7F3EE · C0 M2 Y4 K3
Onyx text	■ #2D2933 · C12 M20 Y0 K80
Gold rule	■ #C2A05E · sprig #7E6FA0 · sage #8A9A78
Resolution	Vector (infinite); any raster ≥ 300 dpi
Stock	Premium cream / soft-matte BOPP film (waterproof — fridge + wet), permanent glass-rated adhesive. No glossy white.
Finish	Matte laminate recommended

Fonts

Fraunces (wordmark + "Lavender Simple Syrup") + Inter (all else). Free / SIL OFL. **Outline before print.**

Before you print — verify (CFIA Industry Labelling Tool, free)

- **Nutrition Facts** on the back is a **generic estimate** from comparable market syrups (Torani / Monin ~45–50 cal, ~11–12 g sugar per 15 mL). Replace with a **calculated table from the real recipe** (database or lab), or confirm the small-supplier exemption.
- **"High in sugars / Élevé en sucres"** front-of-pack symbol: at ~12 g sugar (12% DV) per 15 mL it is likely under the 15% threshold, but confirm against the real recipe and serving.
- **UPC is a placeholder** (012345678905). Replace with your **GS1 Canada GTIN** (Grocery sector) before any retail/Amazon sale.
- Have the **French copy** professionally verified (it is draft).
- Confirm **net-quantity type height** for the panel area.
