

Bench & Bloom Lavender Syrup: Label Generation Specification

Complete input for generating the 250 mL wrap label (Canada)

Document	JATEL_LabelGenSpec_v1.2_20261003
Revision	v1.2 (2026-10-03): sugars symbol moved to the top-right of the front panel (owner decision), right edge 8.4 mm in from the panel edge so the buffer stays $\geq 10\%$ of the panel width from the side; layout of record is now BenchAndBloom_FrontPanel_v3; print files reissued as wrap v3.1. QR repointed to the general recipes page https://benchandbloom.com/recipes (owner decision), new QR file. Nothing else changed. v1.1 (2026-10-03): “Prepared by”; lavender as (<i>Lavandula</i>); BenchandBloom.com added; Nutrition Facts rebuilt to the simplified format with generated artwork; official sugars symbol, UPC and QR supplied as ready files; ingredient-list format rules (FDR B.01.008.1/.2); space budget remeasured
Date	2026-10-03 (Pacific)
Prepared by	Nelson Jatel, Bench & Bloom, with Claude Code
Product	Bench & Bloom Lavender Syrup / Sirop à la lavande, 250 mL
Market	Canada (Amazon.ca and direct). No US variant in this version
Supersedes	All July 2026 label artwork (1:5 refrigerated formulation). See §10, “Do not use”
Source of record	JATEL_LabelGenSpec_v1.1_20261003.md (superseded by this version, layout only), JATEL_ProductSpec_v1.0_20260906.md, singlelabel/Label_PrinterSpec_Wrap_uLine2026.md v2.0, JATEL_LabelRedesign_v1.0_20260908.md, repo commit f1f2266

0. How to use this document

This document is written to be handed to an AI image or layout generator (or a human designer) as the **complete and only input** for drawing the label. Everything needed is here: the bottle, the geometry, every word of copy in English and French, the type, the colours, the assets, the regulatory constraints, and the tests the output must pass. Appendix A repeats the essentials as machine-readable JSON.

Rules for the generator. Read these first.

1. **Use copy verbatim.** Every string in §5 to §8 is final wording (French pending professional verification). Do not paraphrase, shorten, translate, correct or “improve” it.
2. **Never invent.** No new claims, badges, certifications, awards, nutrient values, dates, lot numbers, addresses, URLs or ingredients. If something seems missing, leave a clearly marked placeholder and report it.
3. **Do not draw regulated artwork.** The “High in sugars” symbol, the UPC barcode and the QR code are placed from supplied files or generated by the specified tool, never drawn or re-typed.
4. **Work in millimetres, vector.** Output SVG (and PDF) at final size, 1 unit = 1 mm, with the layers listed in §12.4.
5. **Respect every minimum** in §3, §4.2, §5 and §7 (type heights, symbol size, barcode magnification, QR size, safe margin). A minimum is a floor, not a target.
6. **Run the acceptance tests in §14** and report PASS / FLAG for each. A label that fails any Critical test is not finished.

7. Items marked **[VERIFY]** are best current answers awaiting confirmation (CFIA, a refractometer, a translator). Build to them as written and list them in your output report.

1. The product (data of record)

Field	Value
Brand	Bench & Bloom
House line / descriptor	NARAMATA BENCH BOTANICALS
Common name (mandatory, bilingual)	Lavender Syrup / Sirop à la lavande
Net quantity	250 mL (8.45 fl oz)
Formulation	11 : 5 sugar : water by volume, acidified with citric acid, hot-filled
Sugar concentration	64 °Brix (recipe-calculated; refractometer reading pending, §15)
pH	stated as ≤ 3.5 (estimate 2.34; colour indicator brackets ≤ 3.0)
Shelf stability	Ambient shelf-stable. Refrigerate after opening
Colour in bottle	Deep ruby to garnet red , clear, viscous. Not blue
Flavour	Lavender (Grosso), bright citric lift, sweet
Lavender	<i>Lavandula xintermedia</i> 'Grosso', grown on the farm, Naramata Bench, BC
Made at	3820 Partridge Rd, Naramata, BC, Canada V0H 1N1
GTIN (UPC-A)	627146286305 (GS1 Canada)
Website (printed)	BenchandBloom.com

2. The bottle the label is applied to

The label is designed for one container only. Do not adapt it to another bottle without redoing §3.

Property	Value	Source
Supplier and item	Uline S-23397 , 8 oz Clear Boston Round, glass	Uline Canada product page; verified in hand, order 53425173, 48 EA received 2026-06-23
Nominal capacity	8 oz (≈ 237 mL) nominal; filled with 250 mL	Uline; fill per product spec
Overall height	5.437 in (138.1 mm) , cap on	Uline
Body diameter	2.375 in (60.3 mm)	Uline
Circumference	7.461 in (189.5 mm)	$\pi \times 60.3$ mm
Straight (labellable) body panel	3.125 in (79.4 mm) tall	Uline
Shape	Boston round: cylindrical through the full label panel, rounded shoulder, narrow neck	Physical bottle
Neck finish	28-400	Uline
Cap	Included with S-23397, shipped attached	Uline listing; order 53425173
Empty weight	209 g with cap (Uline unit weight 0.46 lb)	Uline listing
Filled weight	≈ 540 g (209 g bottle + 329 g syrup + ~ 2 g label)	Box packaging spec, 2026-09-06
Tamper band	Uline S-17668 black PVC shrink band, 55 × 28 mm , over cap and neck, sits above the label	Printer spec v2.0

Property	Value	Source
Glass	Clear (flint). The ruby syrup is visible through the rear window and above and below the label	

Fit check [VERIFY]. A nominal 8 oz Boston round holding 250 mL is filled close to the neck. Before printing, fill one bottle with exactly 250 mL of hot syrup, let it cool, and confirm the fill line sits above the label's top edge and below the band.

3. Label geometry

3.1 Overall

Dimension	Inches	Millimetres
Trim (finished, die-cut) size	7.25 × 2.75	184.15 × 69.85
Bleed, all four sides	0.125	3.175
Artwork / document size including bleed	7.50 × 3.00	190.50 × 76.20
Safe margin inside trim, all four sides	0.125	3.175
Live (safe) area	7.00 × 2.50	177.80 × 63.50
Corner radius	none specified (square cut) [VERIFY with printer]	

Wrap math. The 184.15 mm label on a 189.5 mm circumference leaves a ≈ 5.3 mm (0.21 in) vertical strip of bare glass at the back where the two ends approach. This is intentional: the ends never have to meet or overlap, so hand application is forgiving, and the ruby syrup shows through.

Vertical placement. The 69.85 mm label centres in the 79.4 mm straight panel, leaving ≈ 4.8 mm (0.19 in) clear above and below. The shrink band stays above the label.

3.2 Coordinate system and panels

Origin (0, 0) = **top-left corner of the trim**. x increases right, y increases down, units mm. Bleed extends to $x = -3.175$ and $y = -3.175$.

Panel	x from	x to	Width	Usable (inside safe)	Faces
Left wing	0.00	60.50	60.50	x 3.175 to 59.00 (55.8 mm), y 3.175 to 66.675	Wraps to the back, left of the seam
Front panel (PDP)	60.50	123.70	63.20	x 60.50 to 123.70, y 3.175 to 66.675 (63.2 × 63.5)	Front of the bottle
Right wing	123.70	184.15	60.45	x 125.20 to 180.975 (55.8 mm), y 3.175 to 66.675	Wraps to the back, right of the seam

Keep a **1.5 mm gutter** on the wing side of each front/wing boundary (x 59.00 to 60.50 and x 123.70 to 125.20). Two thin **Bench Gold** vertical rules (0.3 mm, #C2A05E, full live height) may mark the front-panel boundaries at $x = 60.50$ and $x = 123.70$; they are decorative and optional.

Usable wing area = $55.8 \times 63.5 \approx 3,543$ mm² each. (Earlier documents used $60.5 \times 63.5 = 3,841$ mm², which ignored the safe margin at the rear seam and the gutter. Use 3,543.)

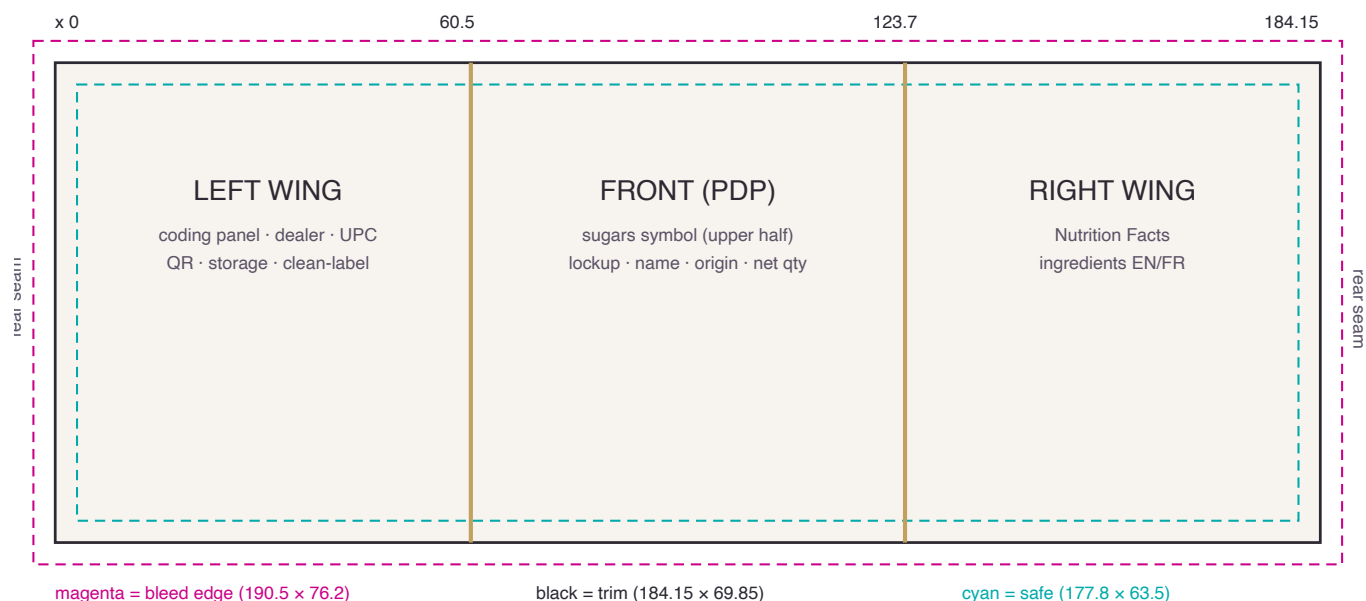

Figure 1. Flat layout at trim size (mm). The two outer ends meet at the back of the bottle with a ≈ 5.3 mm bare-glass gap.

4. Typography and colour

4.1 Fonts

Use	Family	Weight	Licence / file
Wordmark “Bench & Bloom”, English common name “Lavender Syrup”	Fraunces	700	SIL OFL; node_modules/@fontsource/fraunces
Everything else	Inter	500 regular text, 600 emphasis, 700 Nutrition Facts headings	SIL OFL; node_modules/@fontsource/inter

Outline all type before print (or embed the fonts). If Fraunces is missing, the renderer falls back to Georgia, which is wrong; embed both families.

Type-size measures used in this document. Inter cap / numeral height = $0.727 \times$ font size. Inter x-height (lowercase “o”) $\approx 0.55 \times$ font size. Fraunces x-height $\approx 0.50 \times$ font size [Moderate confidence: font metrics, re-measure on the outlined art].

4.2 Minimum type heights

Text	Minimum	Measured on	Font size that meets it (Inter)
Net quantity numerals (PDS > 32 to ≤ 258 cm ²)	3.2 mm	numeral height	≥ 4.5 mm (gives 3.27 mm)
All other mandatory text (common name, storage, dealer, best-before field names)	1.6 mm (SFCR s. 210, confirmed on CFIA 2026-10-03)	lowercase “o” (x-height)	≥ 2.95 mm (8.4 pt)
Ingredient list (own rules, FDR B.01.008.1)	1.1 mm x-height, 2.5 mm leading; 1.4 mm / 3.2 mm if the Nutrition Facts nutrients are ≥ 8 pt (Fig 6.1(B))	lowercase “x”	≥ 2.0 mm (Fig 6.2(B)) / ≥ 2.6 mm (Fig 6.1(B))
Nutrition Facts table	Per the Health Canada format chosen (§8.1)	as specified by the format	as specified

Text	Minimum	Measured on	Font size that meets it (Inter)
Voluntary text (tasting line, clean-label line, origin claim)	no legal minimum; keep ≥ 1.8 mm font for legibility		≥ 1.8 mm

The 1.6 mm rule is the single biggest space driver on the wings. CFIA: mandatory information must be at least 1.6 mm, measured on the lowercase “o” [SFCR s. 210, 211]; the 0.8 mm exception applies only to a principal display surface ≤ 10 cm². The Nutrition Facts table, the ingredient list and the net quantity have their own rules and are not governed by it. The July 2026 artwork set its back copy at 4.4 to 4.6 pt (x-height ≈ 0.9 mm), which fails.

4.3 Colour palette

Ground is full-bleed Chalk White. CMYK values are the print values; spot Pantone 5275 C may replace Lavender Deep if the printer offers spot colour.

Role	Name	HEX	CMYK	Use
Ground	Chalk White	#F7F3EE	0 / 2 / 4 / 3	Full-bleed background
Wordmark, English common name	Lavender Deep	#5A4A78	25 / 38 / 0 / 53	Display type only
Sprig buds	Lavender	#7C6A9C	21 / 32 / 0 / 39	Accent, never body text
Legal and body text	Onyx	#2D2933	12 / 20 / 0 / 80	All mandatory text, net quantity, origin claim
Secondary text	Ink Soft	#5A5266	12 / 19 / 0 / 60	French common name, tasting line
Rules	Bench Gold	#C2A05E	22 / 31 / 70 / 4	Thin rules only, never fills or text
Descriptor text	Gold Deep	#7A5E28	22 / 41 / 90 / 36	“NARAMATA BENCH BOTANICALS”
Sprig stem	Sage	#8A9A78	26 / 9 / 40 / 16	Stem only
Barcode, QR	True black on white	#000000 on #FFFFFF	0 / 0 / 0 / 100 on paper white	Codes only
Sugars symbol	as supplied in the EPS (black and white)			Never recolour

Text contrast: all mandatory text in Onyx on Chalk White. No text on photographs, gradients or tints.

5. Front panel (principal display panel)

The front panel is the **current layout of record** (owner-directed changes 2026-10-03): `singlelabel/redesign/BenchAndBloom_FrontPanel_v3.html` (rendered to .pdf and .png; identical to v2, commit 5b5134d, except that the sugars symbol is top-right). Reproduce it exactly; the zones below are its source values. Mandatory text on this panel already meets §4.2 (French common name x-height ≈ 1.7 mm). Panel = 63.2 × 63.5 mm, placed at x 60.50 to 123.70, y 3.175 to 66.675 on the trim. Zone y-values below are measured from the top of the panel (add 3.175 for trim coordinates).

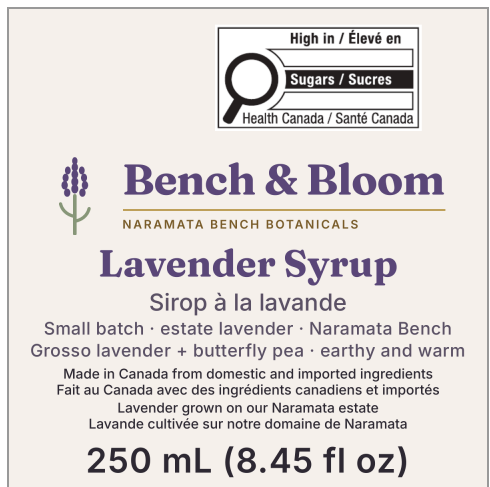

Figure 2. Front panel v3 at true size (63.2 × 63.5 mm). The sugars symbol shown is a raster preview; production must place the vector EPS.

Zone	y from	y to	Height	Content	Status
1	0.0	18.0	18.0	“High in sugars / Élevé en sucres” symbol + clear buffer, top-right: 2.0 mm from the top of the panel, right edge 8.4 mm in from the panel's right edge	Mandatory, prescribed position
2	18.0	31.0	13.0	Horizontal brand lockup , 54 × 15 mm envelope, centred	Brand
3	31.0	41.0	10.0	Common name , English then French, centred	Mandatory
4	41.0	47.0	6.0	Tasting line, two lines, centred	Voluntary
5	47.0	56.5	9.5	Origin claim EN + FR, then lavender-origin claim EN + FR (4 lines), centred	Voluntary, owner decisions 2026-10-03
6	56.5	63.0	6.5	Net quantity , centred	Mandatory
	63.0	63.5	0.5	spare	

5.1 Element specifications

Element	Exact copy	Font	Size	Colour
Sugars symbol	official file singlelabel/fop-symbol/5.6(BH).eps	n/a	28.0 × 14.2 mm, do not scale	as supplied
Lockup: sprig mark	vector, 8.4 × 10.92 mm, left of the wordmark, 2.0 mm gap	n/a		buds #5A4A78, stem #8A9A78

Element	Exact copy	Font	Size	Colour
Lockup: wordmark	Bench & Bloom	Fraunces 700, tracking –0.012 em	5.7 mm	#5A4A78
Lockup: rule	0.28 mm line under the wordmark, full text width			#C2A05E
Lockup: descriptor	NARAMATA BENCH BOTANICALS	Inter 600, caps, tracking 0.15 em	1.58 mm	#7A5E28
Common name EN	Lavender Syrup	Fraunces 700, line-height 1.05	5.0 mm	#5A4A78
Common name FR	Sirop à la lavande	Inter 500, 0.7 mm below EN	3.1 mm	#5A5266
Tasting line 1	Small batch · estate lavender · Naramata Bench	Inter 500, tracking 0.02 em, line-height 1.25	2.3 mm	#5A5266
Tasting line 2	Grosso lavender + butterfly pea · earthy and warm	as above	2.3 mm	#5A5266
Origin EN	Made in Canada from domestic and imported ingredients	Inter 500, line-height 1.25	1.8 mm	#2D2933
Origin FR	Fait au Canada avec des ingrédients canadiens et importés	as above, same size as EN	1.8 mm	#2D2933
Lavender origin EN	Lavender grown on our Naramata estate	Inter 500, line-height 1.2 (whole origin block)	1.8 mm	#2D2933
Lavender origin FR	Lavande cultivée sur notre domaine de Naramata	as above	1.8 mm	#2D2933
Net quantity	250 mL (8.45 fl oz)	Inter 600, tracking 0.02 em	4.5 mm (minimum)	#2D2933

5.2 Front panel rules

- **Sugars symbol.** Upper half of the panel (the panel's height $\geq$ its width). Clear buffer on all sides equal to the x-height of the symbol's own text (≈ 2 mm, [VERIFY] by measuring the EPS); nothing may enter it. The buffer's outer edge must be at least 10% of the principal display surface width in from the left and right edges: ≥ 6.32 mm from each side of the 63.2 mm panel, which leaves a 50.6 mm window. The symbol is placed **top-right**: its right edge 8.4 mm in from the panel's right edge, so a 2.0 mm buffer ends 6.4 mm in (≥ 6.32 mm). Do not move it further right. Measured in the rendered panel and in the wrap v3.1 print file, the symbol's ink ends 9.0 and 8.8 mm in from the edge (the official file carries a thin white margin). The left side of zone 1 stays empty. Size row: PDS band > 30 to ≤ 100 cm² (PDS pinned at 60.2 to 94 cm²). Use 5.6 (BH) (English first). Never redraw, recolour, stretch or re-typeset it.
- **No sugars claims on the front.** With the symbol present, no sugars-related nutrient content claim may appear on the PDP ("lightly sweetened", "less sugar", "low sugar", etc.). Only "reduced in sugar" would be permitted, and it does not apply.
- **Origin claim.** Always the full sentence. Never "Made in Canada" alone, never "Product of Canada" / "Produit du Canada". English and French at the same size; the qualifier never smaller than "Made in Canada". **Never merge the lavender into the qualifier** ("Made in Canada from Canadian grown estate lavender" is not permitted: it hides

the imported sugar). The lavender claim is a separate ingredient-origin claim on its own lines, which CFIA allows when truthful.

- **No slack.** The panel has 0.5 mm spare after the lavender-origin lines (2026-10-03).
- **Net quantity.** Metric first, then US customary in brackets. Numerals ≥ 3.2 mm tall.
- Anything added to the front panel must displace something.

6. Back panels: what goes where

6.1 Content tiers

Tier	Element	Default wing	Est. area at legal type size
1 Mandatory	Nutrition Facts table, bilingual (supplied artwork, §8.1)	Right	2,396 mm² (Fig 6.2(B), 46.0 × 52.1 mm, measured) or 2,991 mm ² (Fig 6.1(B))
1 Mandatory	Ingredient list, EN + FR, boxed (§8.2)	Right	≈ 650 mm ² at 1.1 mm x-height / 2.5 mm leading
1 Mandatory	Storage instruction, EN + FR	Left	≈ 390 mm ²
1 Mandatory	Dealer name and address + BenchandBloom.com	Left	≈ 790 mm ²
2 Commercial	UPC-A barcode at 80% (34.2 × 20.0 mm)	Left	683 mm ²
2 Commercial	Coding panel (best-before + lot), blank	Left	638 mm ² (51 × 12.5)
3 Optional, keep	QR code to the lavender milk recipe (13 × 13 mm supplied)	Left	169 mm ²
3 Optional, keep	Clean-label line, EN + FR	Left	≈ 420 mm ²
3 Optional, cut	“How to use”, story	none	the QR and BenchandBloom.com carry these
Reserved, gated	Bee Friendly Farming logo, 14 × 14 mm	Left	Only after certification and a signed logo-use agreement. Leave the space empty; do not place the logo
Reserved, gated	Buy BC logo	none	Only after a licence is granted. Do not place

Default allocation (use this). Storage and the clean-label line move to the **left** wing so the right wing can carry the two largest mandatory blocks at full legal size.

- **Right wing ≈ 3,050 of 3,543 mm² (≈ 86%):** Nutrition Facts Fig 6.2(B) 2,396 (measured) + ingredient box ≈ 650. The table is 52.1 mm tall, leaving ≈ 11.4 mm of the 63.5 mm live height beneath it for the ingredient box.
- **Left wing ≈ 3,310 of 3,543 mm² (≈ 93%):** coding panel 638 + storage 390 + dealer and web 790 + UPC 683 + QR 169 + clean-label 440 + BFF reserve 196.

This is tight. If the left wing overflows, drop the clean-label line first, then the BFF reserve. If Figure 6.1(B) is required (§8.1), the right wing does **not** fit with the ingredient box: escalate, do not shrink type. Never set mandatory type below §4.2 or §8.2.

Area figures for text blocks are estimates from character counts; the Nutrition Facts, UPC and QR areas are measured from the supplied files.

7. Left wing (x 3.175 to 59.00 mm)

Suggested order, top to bottom. Left-aligned at x = 3.175 unless noted.

7.1 Coding panel (variable data, stamped per batch)

- **51.0 × 12.5 mm**, top of the left wing, **plain ground** (Chalk White or pure white): no rules, tints or artwork behind it.
- Pre-printed field names (Inter 600, Onyx, at the \$4.2 minimum), value areas **left blank**:

BEST BEFORE / MEILLEUR AVANT	[blank, ~30 mm]
LOT	[blank, ~30 mm]

- **Never print a date or lot value in the artwork.** Values are stamped at fill, e.g. 2027 SE 15 and 20260915-01.
- Date format: year, bilingual month symbol, day. Month symbols: JA FE MR AL MA JN JL AU SE OC NO DE.
- Lot format: YYYYMMDD-nn (bottling date + sequence).
- **Print instruction:** this window gets a **coating knockout**: no laminate and no varnish inside the 51 × 12.5 mm area, so solvent ink can key and dry.

7.2 Storage (mandatory)

Refrigerate after opening / Réfrigérer après ouverture

Never “Keep refrigerated” (the product is shelf-stable unopened).

7.3 Dealer name and address (mandatory)

Prepared by / Préparé par:
Bench & Bloom, 3820 Partridge Rd, Naramata, BC, Canada V0H 1N1
BenchandBloom.com

- The civic number **3820** and postal code **V0H 1N1** are mandatory and exact. (July art printed V0H 1N0: wrong.)
- Never any other address.
- **“Prepared by / Préparé par”** (owner decision 2026-10-03): Bench & Bloom makes the product itself.
- **Web address BenchandBloom.com** prints on its own line under the address, exactly in that capitalisation (owner decision 2026-10-03). It is not mandatory text, but set it at the same size as the address.

7.4 Clean-label line (voluntary)

No essential oils, no artificial colour, no synthetic flavour.
Sans huiles essentielles, sans colorant artificiel, sans arôme synthétique.

7.5 UPC-A barcode

- GTIN **627146286305**. Use `singlelabel/artwork/JATEL_UPC-627146286305_100pct_v1.0_20261003.svg`: the official GS1 file with only width, height and viewBox added so it places at true size (100% = 42.74 × 24.96 mm, X-dimension 0.33 mm). The original brand/labels/barcode-image-627146286305.svg has no size and will crop or mis-scale. Never re-typeset the digits or rebuild the bars. Verified: decodes as 0627146286305.
- Place at **80%** (34.19 × 19.97 mm) for this label; anything from 80% to 100% is acceptable. Scale both axes together. Do not truncate the bar height.
- True black bars on a plain white block, quiet zones intact (≥ 9 modules left and right). No tint, no reverse, no rotation, not across the curve's tightest point: keep it on the left wing, bars vertical.

7.6 QR code

- Encodes exactly <https://benchandbloom.com/recipes>, the general recipes page (owner decision 2026-10-03; live, HTTP 200, checked 2026-10-03). It replaces /recipes/lavender-milk, which v1.0 and v1.1 used because

that serve shows the colour change in milk.

- **Use `singlelabel/artwork/JATEL_QR-Recipes_v1.0_20261003.svg`:** generated 2026-10-03 (segno, version 3, error correction M, 29 modules + 4-module quiet zone, 13.0 × 13.0 mm, module 0.351 mm). Verified: decodes to the exact URL. Do not reuse `JATEL_QR-LavenderMilk_v1.0_20261003.svg` (v1.1, /recipes/lavender-milk) or the July artwork's QR (/recipes/naramata-sunset).
- Minimum **11 × 11 mm** including a 4-module quiet zone. True black on white, no logo inside, no recolouring, no cropping of the quiet zone.
- Optional caption below, Inter 500, 1.8 mm, Ink Soft: Recipes · Recettes.

7.7 Bee Friendly Farming reserve

Leave a 14 × 14 mm clear area near the address block. Place nothing in it until certification is confirmed.

8. Right wing (x 125.20 to 180.975 mm)

8.1 Nutrition Facts table (mandatory)

Values (recipe-calculated, per 30 mL; reference amount confirmed by Health Canada 2026-09-17):

Line (EN / FR)	Amount	% Daily Value
Per 30 mL (2 tbsp) / pour 30 mL (2 c. à soupe)		
Calories / Calories	100	
Fat / Lipides	0 g	0 %
Carbohydrate / Glucides	26 g	
Sugars / Sucres	26 g	26 %
Protein / Protéines	0 g	

Footnote, verbatim:

*5% or less is a little, 15% or more is a lot
*5% ou moins c'est peu, 15% ou plus c'est beaucoup

Format: bilingual simplified standard, Health Canada *Directory of Nutrition Facts Table Formats*, Figure 6.1(B) to 6.4(B). The simplified format applies because 6 or more of Calories and the core nutrients are 0. It lists Calories, fat, carbohydrate, protein and any core nutrient that is not 0 (here sugars, indented with its %DV). **Sodium is 0, so it is not shown as a row;** it is named in this mandatory statement (Directory wording, with “sugars” removed because sugars are declared):

Not a significant source of saturated fat, trans fat, fibre, cholesterol, sodium, potassium, calcium or iron. / Source négligeable de lipides saturés, lipides trans, fibres, cholestérol, sodium, potassium, calcium et fer.

Use the supplied artwork; do not rebuild the table.

File	Size	Use
<code>singlelabel/artwork/JATEL_NutritionFacts-Fig6.2B_v1.0_20261003.svg / .pdf</code>	46.0 × 52.1 mm	Default. Fits the right wing with the ingredient box
<code>singlelabel/artwork/JATEL_NutritionFacts-Fig6.1B_v1.0_20261003.svg / .pdf</code>	52.0 × 57.5 mm	Only if Fig 6.1(B) is required; then the ingredient box does not fit on the right wing

Format selection rule: use the **largest** of Figures 6.1(B) to 6.4(B) that fits within **15% of the available display surface (ADS)**, before dropping to the horizontal formats. With ADS taken as the label area ($\approx 128.6 \text{ cm}^2$), $15\% \approx 19.3 \text{ cm}^2$, which neither figure meets; with ADS as the bottle's whole labellable surface it may be larger. **[VERIFY the ADS and the figure with AskCFIA.]**

The artwork is black on white, Arial / Arial Narrow (Helvetica-metric), fonts embedded (PDF) or outlined (SVG). Built from the Directory text for Figures 6.1(B) and 1.1(E): 0.5 pt box within 3 pt of text, 13 pt (6.1) / 9 pt (6.2) heading, 9 / 8 pt serving, 10 / 9 pt Calories, 6 pt bold %DV subheading, 8 / 7 pt nutrients (non-indented bold, indented regular), 0.5 pt thin and 2.5 pt thick rules, 6 pt condensed footnotes with 13 pt / 10 pt / 7 pt leading. **Assumed where the Directory text was silent:** nutrient leading under thin and thick rules, the 1 pt rule under the serving size, the 6 pt / 5 pt indent, and Fig 6.2 leadings. Compare against the Figure 6.1(B) and 6.2(B) drawings before print.

Sensitivity. The sugars value (25.69 g unrounded) sits 0.19 g above the 25.5 g rounding boundary. If the batch refractometer reads 64 °Brix or lower, sugars and carbohydrate become **25 g / 25 %**. Treat the three sugars-related numbers as a single variable set: {carb_g, sugars_g, sugars_dv} = {26, 26, 26} now; update all three together if the measured Brix moves.

8.2 Ingredient list (mandatory)

Descending order by weight (sugar 2,200 g > water 1,183 g > lavender $\approx 50 \text{ g}$ > citric acid $\approx 13.5 \text{ g}$ > butterfly pea $\approx 2 \text{ g}$):

Ingredients: Sugar, water, lavender (Lavandula), citric acid, butterfly pea flower (Clitoria ternatea).
Ingrédients : Sucre, eau, lavande (Lavandula), acide citrique, fleur de pois bleu (Clitoria ternatea).

- Lavender is named by genus only, (**Lavandula**) (owner decision 2026-10-03).
- **Format rules, in force (FDR B.01.008.1, B.01.008.2, B.01.012; CFIA, checked 2026-10-03):**
 - one standard **sans-serif** font (Inter is acceptable), characters never touching;
 - ingredients in **regular** type: **no bold, italics or underline**, so the botanical names are **not italicised**;
 - title **“Ingredients:”** and **“Ingrédients :”** in **bold**;
 - type **100% solid black** (not Onyx) on white or a neutral background with at most 5% tint (Chalk White #F7F3EE qualifies, CMYK max 4%);
 - x-height $\geq 1.1 \text{ mm}$ with identical leading $\geq 2.5 \text{ mm}$; $\geq 1.4 \text{ mm} / 3.2 \text{ mm}$ if the Nutrition Facts nutrients are 8 pt or larger (Fig 6.1(B));
 - a **solid-line border** around the list, or a contrasting background colour;
 - English and French versions each **begin on a new line** (the ADS is over 100 cm^2).
- French uses a space before the colon (Ingrédients :).
- No “Contains” allergen statement: no priority allergens are present. [VERIFY] add a “may contain” statement only if shared equipment creates real cross-contact.

9. Hard rules (never break)

1. Brand is **Bench & Bloom**. Provenance is the **Naramata Bench, Okanagan, BC**. Never “Provence”, “France” or “French lavender”.
2. Never: “organic”, “100% natural”, “Product of Canada / Produit du Canada”, “Keep refrigerated”, “shelf-stable”, “low sugar”, “lightly sweetened”, any health claim.
3. **No blue-to-pink or “add citrus to turn it pink” copy.** The syrup is already red. (The website’s ruby-to-violet-in-milk story is fine on the site and behind the QR, but stays off the label.)
4. No pH or °Brix values on the label; they live in the batch record keyed by the lot code.
5. No printed dates or lot numbers in the artwork.
6. All mandatory information in English **and** French.
7. Do not redraw the sugars symbol, the barcode or the QR.
8. No photographs on the label. The product in clear glass is the hero; the label is typographic.
9. No placeholder text in the final file (“Lorem”, “XXX”, “[address]”, “TBD”).

10. No unlicensed marks (Bee Friendly Farming, Buy BC, Amazon, GS1 logos).

10. Assets

Asset	Path (repo bench-and-bloom)	Use
Sugars symbol, ready to place	singlelabel/artwork/JATEL_F0PSy mbol-Sugars-5.6BH_v1.0_2026100 3.svg / .pdf	Use this. Converted from the official 5.6 (BH) .eps with Ghostscript (EPSCrop) then pdftocairo: pure vector, no fonts, no images, exactly 28.0 × 14.2 mm. Not redrawn
Sugars symbol, source	singlelabel/fop-symbol/5.6(BH) .eps	Official Health Canada file; for layout software that takes EPS
Nutrition Facts	singlelabel/artwork/JATEL_Nutri tionFacts-Fig6.2B_v1.0_2026100 3.svg / .pdf (and Fig6.1B)	§8.1
UPC-A, sized	singlelabel/artwork/JATEL_UPC-6 27146286305_100pct_v1.0_2026100 3.svg	§7.5
QR	singlelabel/artwork/JATEL_QR-Re cipes_v1.0_20261003.svg (general recipes page)	§7.6
Alternatives	5.6 (HB) .eps (French first), 5.6 (BV) .eps (vertical)	Only if asked
Front panel source	singlelabel/redesign/BenchAndBloom_FrontPanel_v3.html / .pdf / .png	Reference layout, fonts embedded (v2 kept for history; symbol centred)
Front panel with measurements	singlelabel/redesign/BenchAndBloom_FrontPanel_v2_measured.pdf	Zone marks in mm (zones unchanged in v3)
Print files, current	singlelabel/v3/JATEL_LabelWrap_v3.1_20261003_* (print PDF, 600 dpi PNG and JPG, CMYK TIFF, dieline, guides proof), built by build_wrap_v3.py and render_v3.sh	Sugars symbol top-right; 39 layout checks pass; UPC and QR decode from PNG, TIFF and PDF
Print files, previous	singlelabel/v3/JATEL_LabelWrap_v3.0_20261003_*	Symbol centred; superseded by v3.1, do not send
Horizontal lockup	singlelabel/redesign/BenchAndBloom_Lockup_Horizontal_v2.html / .pdf	Lockup alone
UPC barcode, original	brand/labels/barcode-image-627146286305.svg	Official GS1 output; no physical size set, use the sized copy above
Fonts	node_modules/@fontsource/fraunc es, node_modules/@fontsource/int er	Embed or outline
Stacked logo (not for this label)	public/brand/logo-primary.svg	Website, seal sticker
Do not use	singlelabel/*PRINTREADY*, single label/Label_benchandbloom_Final _uline2026_Wrap.*, brand/labels/ *Front*, *Back*	Superseded July 1:5 artwork

11. Regulatory basis (Canada)

Requirement	Determination	Confidence
Reference amount / serving	Table of Reference Amounts item U.15, 30 mL , serving 2 tbsp	Confirmed by Health Canada, 2026-09-17
Front-of-package symbol	Required: 26% DV sugars vs a 10% DV trigger (reference amount ≤ 30 mL). Sweetening-agent exemption does not apply to a compounded flavouring syrup	High
Symbol size row	$PDS > 30$ to ≤ 100 cm ² $\rightarrow 2.80 \times 1.42$ cm	High (PDS 60.2 to 94 cm ²)
Origin	“Product of Canada” fails CFIA’s 98% rule (imported cane sugar $\approx 65\%$ by mass). “Made in Canada” requires the qualifier	High
Bilingual	All mandatory information EN + FR (sold nationally, including Quebec)	High
Net quantity type	≥ 3.2 mm numerals, PDS band > 32 to ≤ 258 cm ²	Moderate [VERIFY band table]
General type minimum	1.6 mm x-height for mandatory text	Moderate [VERIFY]
Best-before	Not legally required for durable life > 90 days; kept for Amazon and consumers	Moderate [VERIFY]
Butterfly pea	Steeped dried flower declared as an ingredient. [VERIFY] whether CFIA treats it as a colouring agent, which affects the “no artificial colour” claim	Low

12. Print production

12.1 Material

- **Face stock:** soft-matte cream (or white) **BOPP film**, waterproof and oil-resistant. No paper.
- **Adhesive:** permanent clear acrylic, glass-rated, cold and wet resistant (refrigerated after opening, condensation).
- **Finish:** matte laminate or matte varnish over the whole label **except the coding-panel knockout**. No gloss.

12.2 Colour and resolution

- CMYK per §4.3, or spot Pantone 5275 C for Lavender Deep. Vector throughout; any raster ≥ 300 dpi at final size.
- Barcode and QR: 100% K on unprinted white.

12.3 Ordering

- Tell the printer: **finished size 7.25 × 2.75 in (184.15 × 69.85 mm), artwork 7.5 × 3.0 in with 0.125 in bleed, cut centred**. Entering 7.5 × 3.0 as the finished size makes the label too big for the bottle.
- Coating knockout in the coding panel, in these words: *“Leave a coating knockout in the coding panel, no laminate and no varnish in that window, for on-line date coding.”*
- Quantity: about 2× the bottle count for hand application (100 labels for a 48-bottle batch). Labels do not expire with a batch, so a 500 quote is worth getting.
- Buy BC: a label printed in British Columbia counts toward Buy BC eligibility.

12.4 Output files the generator must produce

File	Content
Label_BenchAndBloom_Wrap_v3_<date>.svg	190.5 × 76.2 mm document, mm units, layers: bleed-ground, art, codes (barcode + QR), fop-symbol, coding-knockout (51 × 12.5 mm rectangle marking the no-coating area, non-printing), guides (trim, safe, panel boundaries; non-printing)
Label_BenchAndBloom_Wrap_v3_<date>.pdf	Same, fonts embedded or outlined, guides and knockout layers hidden
Label_BenchAndBloom_Wrap_v3_<date>_preview.png	600 dpi preview with guides visible
Output report	The §14 acceptance tests with PASS / FLAG, plus every [VERIFY] item

13. Application

- Stamp best-before and lot **while the labels are flat on the liner**, with a solvent-based ink rated for non-porous surfaces, before application. Let the ink flash off for a minute.
- Apply to a **cool, dry, clean** bottle (not while hot-filling). Align the top edge, front panel centred on the bottle's front, and roll once. The ends meet at the back with a ≈ 5.3 mm glass gap.
- Shrink band over the cap and neck after capping, above the label.

14. Acceptance tests for the generated label

Each test prints PASS or FLAG. **Critical** failures block print.

#	Test	Pass condition	Severity
1	Document size	190.5 × 76.2 mm artwork; trim 184.15 × 69.85 centred	Critical
2	Safe area	No text, code or symbol outside x 3.175 to 180.975, y 3.175 to 66.675	Critical
3	Panels	Front panel occupies x 60.50 to 123.70; wings left and right	Critical
4	Sugars symbol	Official EPS vector, 28.0 × 14.2 mm, upper half of the front panel, top-right with its right edge 8.4 mm in from the panel's right edge, buffer clear, $\geq 10\%$ inset with a 2.0 mm buffer	Critical
5	Net quantity	250 mL (8.45 fl oz) on the front, numerals ≥ 3.2 mm	Critical
6	Common name	Lavender Syrup and Sirop à la lavande on the front	Critical
7	Origin	Full qualified sentence EN + FR, then "Lavender grown on our Naramata estate" / "Lavande cultivée sur notre domaine de Naramata", on the front, same size; no "Product of Canada" anywhere	Critical
8	Nutrition Facts	The supplied Fig 6.2(B) (or 6.1(B)) artwork placed unscaled; no sodium row; "not	Critical

#	Test	Pass condition	Severity
		a significant source” statement includes sodium	
9	Ingredients	Order sugar, water, lavender (Lavandula), citric acid, butterfly pea, EN + FR on separate lines; bold title; regular type, no italics; 100% black; x-height ≥ 1.1 mm, leading ≥ 2.5 mm; bordered	Critical
10	Storage	Refrigerate after opening / Réfrigérer après ouverture; no “Keep refrigerated”	Critical
11	Dealer	Prepared by / Préparé par: + 3820 Partridge Rd, Naramata, BC, Canada V0H 1N1, exact, + BenchandBloom.com	Critical
12	Coding panel	51 × 12.5 mm, plain ground, field names only, values blank, knockout layer present	Critical
13	Mandatory type	Every mandatory string x-height ≥ 1.6 mm (or as set by the NFt format)	Critical
14	Barcode	Official GS1 vector, 80 to 200%, quiet zones intact, black on white; scans as 627146286305 from a print	Critical
15	QR	Encodes https://benchandbloom.com/recipes , ≥ 11 mm with quiet zone; scans from a print	Critical
16	Forbidden text	None of §9 item 2 or 3 strings appear; no “per 15 mL”, no “V0H 1N0”, no printed date	Critical
17	Bilingual completeness	Every mandatory English string has its French counterpart	Critical
18	Fonts	Fraunces and Inter embedded or outlined; no Georgia/Arial fallback in the output	Moderate
19	Colours	Only §4.3 palette values; codes pure black	Moderate
20	No placeholders	No “TBD”, “XXX”, “[”, “Lorem” in the art	Moderate
21	Physical proof	One printed label wrapped on a filled S-23397 bottle: front centred, seam gap at the back, clears the shrink band, fill line visible above the label	Moderate

The repo check `python3 tools/check_specs.py` covers the front panel geometry and the spec documents; run it after any change to the front panel source.

15. Open items and decisions (defaults used in this document)

#	Item	Default used here	Owner
1	Measure Brix on batch 1 with a refractometer	64 °Brix → sugars 26 g / 26%; 25 g / 25% if measured ≤ 64	Nelson
2	ADS, and therefore Fig 6.1(B) vs 6.2(B)	Fig 6.2(B)	AskCFIA
3	1.6 mm general type minimum	Confirmed (SFCR s. 210, CFIA page read 2026-10-03)	done
4	Tasting line 2 wording	... · earthy and warm (matches site and v2 panel); alternative ... · ruby red, no artificial colour	Nelson
5	Lockup sprig: v2 panel uses the 13-bud sprig; Logo-primary.svg uses the refined final mark	v2 panel sprig	Nelson
6	"Prepared for" prefix	"Prepared by / Préparé par" (owner, 2026-10-03)	done
7	Butterfly pea as a colour additive	Declared as an ingredient	AskCFIA
8	Symbol x-height (buffer size)	≈ 2 mm, 18 mm zone	Measure the EPS
9	Professional French verification	Draft French as written	Translator
10	250 mL fill height in an 8 oz bottle	Assumed to clear the label	Nelson, one test fill
11	Printer corner radius and die	Square	Printer
12	BFF and Buy BC marks	Reserved, not placed	Pending certification / licence
